About me

Full-Stack Developer and Software Engineering graduate from Adigrat University with a strong foundation in software development, algorithms, and data structures. I have hands-on experience building web and mobile applications using JavaScript, Vue 3, React.js, Node.js, Python, Laravel, Spring Boot, and Flutter. I have developed full-stack recruitment and document management systems, business applications, and a transaction-based SMS service integrated with a third-party gateway for a microfinance institution, gaining practical experience in developing, integrating, and deploying software solutions. I am passionate about continuous learning, problem-solving, and building reliable, user-focused applications that improve business processes and efficiency.

Education & Training

Bachelor of Science in Software Engineering | Adigrat University | 02/10/2017 - 29/12/2021 | Adigrat, Ethiopia

- **Relevant Coursework:** Data Structures and Algorithms, Software Engineering Principles, Computer Systems, Databases.

Final grade: CGPA: 3.88/4.0 | Website: www.adu.edu.et

Skills

Programming Languages: | Python | JavaScript | PHP | SQL

Frameworks and Tools: | React | Vue | Django | Flutter | Git | Linux | Tailwind CSS | Spring Boot MVC

Other Skills: | RESTful APIs | CI/CD pipelines | Agile Methodology | Machine Learning

Work experience

Full Stack Developer | Gahdi Digital Investment PLC | 08/06/2026 - Current | Addis Ababa, Ethiopia

- Developed a web-based document management system using Vue 3 and Laravel and maintain web-based applications and RESTful APIs, contributing to ongoing digital product initiatives within the Tora Holding Company.
- Implemented Tora Holding Company's Recruitment Management System and ID Verification System using Vue 3, Tailwind CSS, Node and MySQL database.

System Administrator | Semien Microfinance S.C | 01/05/2026 - 31/08/2026 | Mekelle, Ethiopia

- Procuring, installing, configuring, and updating computer systems, servers, and network devices.
- Core Banking System administration and managing user accounts, and security permissions across the organization's network.

Frontend Developer Freelance | Grand Technology Solutions | 28/02/2026 - 31/05/2026 | Mekelle, Ethiopia

- Developing a web-based business linkage system using Vue.js and REST APIs, improving market connectivity between producers and buyers.

- Configured and maintained network infrastructure across three branches, reducing downtime by 30% through proactive monitoring.

Junior Infrastructure and Networking Officer | Semien Microfinance | 01/05/2024 - 31/08/2025 | Mekelle, Ethiopia

- Configured routers and switches, built an SMS Service system using Python to notify clients, contribute for establishment of Disaster Recovery site, and support for HR system.

Language Skills

Mother tongue(s): **Tigrigna**

	Understanding		Speaking		Writing
	Listening	Reading	Spoken production	Spoken interaction	
English	C1	C1	B2	B2	C1
Amharic	C2	C2	C2	C2	C2

Projects

Recruitment Management System | 14/09/2026 - 19/09/2026

- Developed a centralized recruitment platform for a holding company and its subsidiaries, covering vacancy management, applicant profiles, online applications, candidate screening, shortlisting, and application tracking.
- Designed a reusable applicant profile with role-based access control for applicants, recruiters, HR managers, and administrators.

Document Management System | 11/06/2026 - 30/06/2026

- Build and deploy a centralized, web-accessible DMS for Tora Holding Company and all subsidiaries.
- Enforce strict multi-tenant access control with a matrix permission model supporting cross subsidiary access.
- Organize documents within each subsidiary by configurable document type.

Business Linkage System | 01/03/2026 - 31/05/2026

- Developing a web-based platform using Vue.js, with admin control panel, business management features and performance analytics dashboards.
- Implementing features with seamless backend integration, Pinia for state management, and an AI-assisted recommendation module to match users with relevant business partners.

SMS System

- Built a Django-based SMS service using Python to enable real-time communication between a core banking system and clients via an SMS gateway.
- Improved operational efficiency by automating notifications for financial transactions.

POS System

- Developed a robust Point of Sale (POS) system using React Native (Expo) to streamline sales transactions for retail businesses. It delivers a user-friendly interface optimized for both Android and iOS platforms, ensuring smooth navigation and quick operation.

Library Management System

- A library management is a web based project using Html, CSS, PHP, and Mysql that manages and stores books information electronically according to students and admin needs.

Wdase Mariam

- This system is a mobile app that is developed using React Expo (React native). It is an Orthodox prayer book and contains Geez and Tigrigna languages.

Volunteering

VBT Data entry clerk - Relief Society of Tigray (REST)

Facilitating Cash Distribution Activities - World Vision(WV) Ethiopia
