ABOUT ME

I am a recent graduate from Adigrat University, specializing in Software Engineering. With a strong academic background and a passion for technology, I am eager to embark on a career in software engineering and contribute to the ever-evolving field. During my time at Adigrat University, I gained a solid foundation in software development principles, algorithms, and data structures. Through coursework and practical projects, I honed my skills in programming languages such as Java, C++, and Python, as well as web development technologies like HTML, CSS, and JavaScript and related frameworks such as React.js & Angular and mobile app development technologies like React native(expo) and Android studio(java) also developed a keen understanding of software development methodologies and best practices, enabling me to produce efficient and high-quality code.
